CHEMICAL & METALLURGICAL ENGINEERING

R. S. McBRIDE
Washington
PAUL D. V. MANNING
San Francisco
Assistant Editors

M. A. WILLIAMSON
Publishing Director

S. D. KIRKPATRICK, *Editor*

Chemical & Metallurgical Engineering is the successor to *Metallurgical & Chemical Engineering*, which, in turn, was a consolidation of *Electrochemical & Metallurgical Industry* and *Iron & Steel Magazine*. The magazine was originally founded as *Electrochemical Industry*.

McGraw-Hill Publishing Company, Inc., New York City

Volume XXXVIII

January to December, 1931

GENERAL ALPHABETICAL INDEX

Pages

January ..... 1 to 64
February ..... 65 to 124
March ..... 125 to 184
April ..... 185 to 256
May ..... 257 to 316
June ..... 317 to 376
July ..... 377 to 436
August ..... 437 to 496
September ..... 497 to 560
October ..... 561 to 620
November ..... 621 to 684
December ..... 685 to 744

A

Absorption and adsorption. C. L. Mantell..*232
Accidents and accident prevention. See Safety.
Acetates—synthesis of amyl chlorides and alcohol. L. H. Clark *206
Acetic acid. Complex situation in manufacture. F. J. Curtis 38
Acids:
Acidproofing chimneys (S.) 413
Acidproofing iron (S.) 724
Domestic production 1927-1929..... 9
Merrimac plant rebuilds and consolidates. C. Belknap *260
Acids, heavy, Varied progress in *218
Adsorbents, reactivating (S.) 291
Adsorption (S.) 102
Adsorption and absorption. C. L. Mantell.*232
Adsorption process for carbon dioxide. G. T. Reich *136
Agitator and conditioner (E. N.) *300
Air:
Conditioner (E. N.) 417
Condition in paper mills (S.)..... 414
Conditioning in pharmaceutical plant. H. M. Merker *71
Washer (E. N.) 670
Alcohol:
Co-operation in formulation (ed.).... 378
Ethyl, production on reduced scale... 57
Products manufactured with denatured 57
Alkali:
Plant efficient and beautiful. P. V. D. Manning *380
Prices and processes *32
Production from soda lakes. W. Hirschkind 657
Alum and aluminates in water treatment. G. J. Fink *535
Aluminum, Refining (S.) 162
Aluminum compounds — production 1927-1929 57
Aluminum oxide for insulation. Barnit & Heilman *390
American Ceramic Society — congress and exposition 144
American Chemical Society—81st meeting at Indianapolis 250
N. Y. rubber division meeting..... 365
American Gas Assn., Chemical conference.. 362
American Institute of Chemical Engineers, Meets at Swampscott 320
Meets at Atlantic City..... 693
American Institute of Mining & Metallurgical Engineers, Petroleum engineering in review 156
American Society for Testing Materials, Symposium on effect of temperatures on metals 398
American Welding Society Meeting..... 607
Ammonia:
Cost calculations (c.) 287
Ammonia, continued:
Graphical determination of ammonia solubility. D. S. Davis..... 576
Low pressure synthesis Mont Cenis process. W. F. Scholvien...*82, *133
Production 1927-1929 60
Shell's plant in California. Ludwig Rosenstein *636
Synthesis (S.) 599
Synthetic, shows large increase..... 41
Ammonium sulphate produced by diverting heat of reaction. Giacomo Fauser *456
Amyl chlorides and alcohols, synthesis of. L. H. Clark *206
Asbestos-cement sheets used to cover buildings to prevent corrosion. E. C. Rack *157

B

Back-stop, silent (E. N.) 360
Barite, Intensive barium technology for industrial needs. W. N. Williams....*650
Bearing, self-aligning (E. N.) 480
Belt, link-wedge (E. N.) *167
Book Reviews:
Alkalien und Erdalkalien. Bruno Waeser 597
Aluminum industry. Edwards, Frary & Jeffries 100
Annual survey of American Chemistry. C. J. West 352
Artificial resins. Scheiber & Sandig.. 723
A.S.T.M. publications 101
Brennstofftechnisches praktikum. M. Dolch 667
Calcium carbide industry. Rudolph Taussig 100
Chemical principles in metallurgy. Franz Sauerwald 159
Chemie und Technologie der Seifen und Waschmittel. Hans Heller 471
Conductivity of solutions and the modern dissociation theory. C. W. Davies 411
Creep of metals. H. J. Tapsell.... 597
Cromatura electrolitica. Osvaldo Macchia 722
Die Deutsche Steinkohlenteerindustrie und Ihre Wirtschaftlichen Zusammenhänge. F. A. Heydenreich.... 410
Eisen und Seine Verbindungen. I. Koppel 472
Electrochemistry. C. J. Brockman .. 667
Electrolysis of aqueous solutions, ed. by Victor Engelhardt 159
Elements of chemical engineering. Badger & McCabe 99
Elements of successful organization engineering. H. S. Dennison..... 160
Explosives and war gases. Paul Pascal 158
Fundamentals of organic chemistry. H. F. Lewis 99
Der Graphit. Oscar Kausch 352
Handbook of chemical microscopy. Chamot & Mason 723
Handbuch der Kunstlichen Plastischen Massen. Oskar Kausch 722
Industrial chemical calculations. Hougen & Watson 721
Industrial electrochemistry. C. L. Mantell 722
Kohlenwassergas. J. Gwosdz..... 472
Laboratory manual of gas, oil and fuel analysis. C. J. Engelder..... 598
Last and first men. W. O. Stapledon. 411
Lunges Handbuch der Schwefelsäurefabrikation. Bruno Waeser..... 352
Book Reviews, continued:
Manufacture of artificial silk, with special reference to viscose process. E. Wheeler 597
Manufacture of lakes and precipitated pigments. A. W. C. Harrison.... 160
Minerals in modern industry. W. H. Voskuil 288
Mineral industry during 1929, ed. by G. A. Roush 101
Die Neueren Fortschritte der Technischen Electrolyse. J. Billiter.... 288
Organic hydrogenation. Carleton Ellis 158
Patent law for chemists, engineers and executives. F. H. Rhodes..... 410
Photoelectric cells and their applications. Wilson & Zworykin..... 289
Plasticity. A. Nadai 667
Policy and ethics in business. C. F. Taeusch 598
Psychology of the inventor. Joseph Rossman 412
Quantity and economy in manufacture. F. E. Raymond 288
Select methods of metallurgical analysis. Naish & Clennell 159
Solvents for nitrocellulose. T. H. Durrans 101
Soviet foreign trade: menace or promise? Budish & Shipman..... 353
Standards and specifications for nonmetallic minerals and their products. J. Q. Cannon, Jr. 101
Treatise on physical chemistry. H. S. Taylor 289
Verdampfen, Kondensieren und Kuhlen. E. Hausbrand 721
Wasserstoff. W. Gluud et al..... 471
Werkstoffe: Physikalische Eigenschaften und Korrosion. Erich Rabald 721
Why recognize Russia? Louis Fisher 353
Zement. F. Wecke 472
Borax. Trona plant enlarges.....*644
Brine extracted from petroleum.....*550
Bromine compounds on Pacific coast. M. Y. Seaton *638
Buildings for factories 197
Burner, combination fuel (E. N.) *164
Burning used for reconditioning air bags. C. E. Maynard *91
Business:
Constructive competition (ed.)..... 1
First step toward the upturn (ed.)... 378
Helping to make better business in process industries—symposium..... 275
How the by blow of industry flourishes (ed.) 67
Missing element in business recovery (ed.) 318
Business platform (ed.) 125
Byproduct, Reforming the baleful byproduct (ed.) 438
Byproduct recovery number.....September

C

Calcium cyanamide production. J. A. Lee.*564
Calender trains, synchronizing operation of. R. G. Lockett *407
Canada, chemical and fertilizer production. S. D. Kirkpatrick *626
Carbide manufacture in cyanamide plant. J. A. Lee *564
Carbon:
Active, in water treatment 536
Determining true calorific values. Alfred Stansfield (c.)..... 97
New materials for construction reduce corrosion losses. J. A. Lee.....*153

NOTES—(c) Comment; (ed) Editorial; (E. N.) Equipment News; *illustrated; (P. N.) Plant Notebook; (S) Synopsis or abstract.

East Engin. Wilson

Carbon Dioxide:
Liquid CO_2 — how technology has harnessed the available sources. G. T. Reich *136
Proof that solid CO_2 is a safe refrigerant. D. H. Killeffer 591
Recorder (E. N.) *167
Removing acidic gases by reaction with organic bases. R. R. Bottoms.... *465
Solid CO_2 technology defers to distribution problems. G. T. Reich.. *270
Carborundum in fractionation (S.)..... 291
Carboy tilter (E. N.) 298
Casein tariff a boomerang (ed.)..... 318
Caustic recovery plant *440
Cement-asbestos sheets used to cover building to prevent corrosion. E. C. Rack *157
Cement grinding improves *218
Centrifugal, continuous and its applications 325
Centrifuge, impregnating (E. N.)..... 605
Centrifuging. Anthony Anable..... 222

Ceramics:
Chemical stoneware, selection and design. J. M. W. Chamberlain..... 142
Electrochemists discuss at meeting.... *264
Graphite crucible plant problems..... *282
Materials (E. N.) 359
Modernize 217
Mojave Desert yields new ceramic body. T. S. Curtis *654
Non-siliceous porcelain (S.) 474
Cerini dialyzers (S.) 600
Charcoal, plans to expand use of..... 735

Chemical Engineering:
Another milestone in education (ed.). 66
Are chemical engineering unit costs worthwhile? (ed.) 687
Are you overstocked in brains too? (ed.) 317
As a career. J. C. Olsen 278
Case for congeniality (ed.)..... 127
Creative engineering (ed.)..... 185
Employment of chemical engineers, one year and ten years after graduation 693
Licensing the chemical engineer (ed.). 127
Oil-well drilling. M. E. Dice..... *632
Opportunity for constructive service (ed.) 318
Pride of authorship, or seeing the world as others see it. J. M. Weiss 285
Ten thousand more chemical engineers for industry to absorb (ed.)..... 685
Tools for the engineer in the design of chemical plants. Crosby Field.... 190
Welcome to Omicron Chi Epsilon (ed.) 379
Western education contributes original courses. W. N. Lacey *646
Yesterday, today, tomorrow (ed.)... 2
Chemical engineering design and construction. Chemical & Metallurgical Engineering plans an issue on..... *188

Chemical Industry:
Another victory for the chemical South (ed.) 258
Chemical revolution and the depression. W. J. Hale 349
Economic appraisal of inter-commodity competition. T. M. Swits..... 6
From small beginnings (ed.) 437
Helping to make better business in process industries, symposium..... 275
How Chemical Division serves industry as focal point between information sources and media 11
Industrial classroom for industrialists (ed.) 687
Nascent technology (ed.) 621
Newer competition of commodities and processes 4
Overorganized? (ed.) 377
Six-hour shift (ed.) 562
Southern chemical industry developing in importance. L. B. Hitchcock 150
Threatened extension of governmental regulation (ed.) 319
Western chemical industries. P. D. V. Manning *622
Chemical & Metallurgical Engineering—Historical summary 3
New home (ed.) 563

Chemicals:
Industrial markets require special study. R. B. Ladoo 403
Production in Western Canada. S. D. Kirkpatrick *626
Sales in 1929 555
Chimneys, acidproofing (S.) 413
Chlorinated copper as used in water purification. L. L. Hedgepeth 534

Chlorine:
Alkali plant efficient and beautiful. P. D. V. Manning *380
Electrolytic cells for, and caustic soda. C. L. Mantell 88
Fishing industry. C. Birdseye *320
Fortunes and misfortunes of Western chlorine. W. Hirschkind..... *660
Sewage and trade waste problems solved by chlorine. L. H. Enslow. *531

Chromium:
Advances in chromium plating. R. J. Piersol (c.) 720
Distilled chromium *111
How to improve durability of plate. R. J. Piersol *386
Technologic advances in chromium plating. J. H. Hansjosten (c.).... 720
Thick plate through operating control. R. J. Piersol *445

Classification, advance in. Anthony Anable 220
Clay, Chemical stoneware, selection and design. J. M. W. Chamberlain.... 142
Clutch, one-way (E. N.) *419
Coal, Liquefaction makes little progress in Germany 174
Processing and use of coal at International Conference. R. S. McBride. 695
Tar products deserve study (ed.).... 378
Coatings removed by electrolytic pickling. 93
Corrosion resisting (E. N.) 729

Coke and Coking:
Byproducts and operations in 1930 and 1929 54
Dry quencher (E. N...) *357
Formula for theoretical recovery of coke. H. E. Wilson (P. N.)..... 601
Synthetic production of ammonia by coke-oven gas. W. P. Scholvien.. *82, *133
Useful conversion of refinery byproducts. L. A. Mekler *538
Color analyzer, recording (E. N.)..... 164
Columns, fractionating. D. B. Keyes.... *226
Comparator, slide (E. N.) 298
Chlorine (E. N.) 730
Compound, sealing (E. N.) 671
Compressed Gas Manufacturers' Assn., Election 111
Compression fittings (E. N.) *300
Concentration control (S.) 724
Conditioner and agitator (E. N.)..... *300
Construction. Build the plant to fit the process. H. E. Stitt *196
Containers, glass. K. M. Henry 656

Control:
Aluminous insulating materials resist high temperatures. Barnitt & Heilman *390
Concentration control (S.) 724
Electric proportioning (E. N.) *604
Electroplating made automatic. A. K. Graham *216
Mixing fuel gases for city gas supply. J. H. Wolfe *578
Sight feed for centralizing control of distillation equipment. D. F. Othmer (P. N.) *415
Synchronizing operation of calender trains. R. G. Lockett *407
Teaching the robot to think ahead. Alan Osbourne *245
Thick chromium plate through operating control. R. J. Piersol..... *445

Controller:
Air operated (E. N.) *669
Air operated cycle (E. N.) 419
Differential limit (E. N.) 420
Stabilized (E. N.) *418

Conveyors:
Car loading (E. N.) *165
Drying machinery suited to continuous processes. A. O. Hurxthal *230
Idlers for belt conveyors (E. N.)..... 478
Rotary pipe (E. N.) 603
Textile materials. R. G. Knowland.. *339
Tubular (E. N.) *357

Corrosion:
Boiler scale (S.) 103
Building materials to resist corrosive atmospheres. E. C. Rack *157
Buried steel corrosion (S.) 413
New materials of construction reduce corrosion losses. J. A. Lee..... *153
Problems discussed at T.A.P.P.I. meeting 151
Tester (E. N.) *477

Costs:
Build the plant to fit the process. H. E. Stitt *196
Economic analysis of the process industries (table) 450
Equipment economies, a road toward cost reduction. L. S. Abbott..... 204
Lowering costs in lifting process materials. L. B. Murdock *468
Process development offers opportunities for ingenuity. C. R. Bowns 103
What is the basis for retiring equipment? R. L. Copson 202
Coupling, flexible (E. N.) *359, 478
Cracking of petroleum hydrocarbons. P. K. Frolich *343
Cracking waste gases to produce aromatics and olefins 346
Cranes, portable (E. N.) 417
Crusher, cone (E. N.) *359

D

Dialyzers, Cerini (S.) 600
Diatoms in California. M. L. Hartmann..*652

Distillation:
Advances in column design. D. B. Keyes *226
Equipment with feed flow control. D. F. Othmer (P. N.)..... *415
Vacuum (S.) 474
Distribution, Industrial markets for chemicals require special study. R. B. Ladoo 403
Door, quick opening (E. N.) *297
Drilling, oil-well. M. E. Dice..... *632

Drive:
Belt (E. N.) *358
Multi-speed (E. N.) *359
Self-contained variable speed (E. N.). *163

Drying:
Applying diffusion calculations to drying porous solids. A. B. Newman.. 710
Dryers for chemical products (S.)... 723
Hot air drying of pharmaceuticals. H. M. Merker *69
Loop roller dryer (E. N.) *105
Reversed currents accomplish two stage spray drying. P. D. V. Manning *702
Reversing pan dryer (E. N.)..... *358
Roller bearing dryers (E. N.)..... *164
Rotary dryer (E. N.) *727
Spray desiccator (E. N.)..... 669
Suiting drying machinery to continuous processes. A. O. Hyrxthal... *230
Survey of different types of dryers. Ralph Becker 94
Textile industry. R. G. Knowland.. *339

Dust and Fume Handling:
Cyclone collector (E. N.)..... 357
Dust collector (E. N.) *481, *478
Filter (E. N.) *604
Problem of atmospheric pollution. R. D. MacLaurin 508
Separation of dust (S.)..... 599
What is ahead in smoke abatement? H. B. Meller 511
Dyeing, corrosion in (S.) 161
Dyestuffs, British protected for another year 113

E

Economic analysis of the process industries (table) 450
Economic influences on chemicals....118, 178, 370, 430, 490, 614

Editorials:
Another milestone in chemical engineering education 66
Another victory for the chemical South 258
Applying laboratory methods to the unemployment problem 66
Are chemical engineering unit costs worthwhile? 687
Are you overstocked in brains too?. 317
Better statistics will aid business recovery 65
Breaking the boundaries of technical localism 439
Campaigns for members 687
Case for congeniality 127
Casein tariff proves a boomerang.... 318
Chemical engineering yesterday, today, tomorrow 2
Chemical industry takes the lead.. 562
Chem. & Met. at Home, 330 West 42d St., N. Y. 563
Constructive competition 1
Continued co-operation in alcohol formulation 378
Convergence of parallel forces..... 319
Creative engineering 185
Dangerous economizing 561
Engineering appraisal of a familiar gold brick 126
Erecting signposts to the better mousetraps 379
Exposition of opportunities..... 126
First step toward the upturn..... 378
From small beginnings 437
Fusion welding for boilers gains A.S.M.E. recognition 438
Gerard Swope's proposal to business.. 562
Hearty welcome to Omicron Chi Epsilon 379
Hollywood hokum 687
How is management meeting the test? 257
How much is the engineer worth?.... 562
How the by blow of industry flourishes 67
Independence for America's rubber industry 127
Industrial classroom for industrialists. 687
Is chemical industry overorganized? 377
Licensing the chemical engineer.... 127
Look for the silver lining..... 319
Missing element in business recovery. 318
Nascent technology 621
New agencies for industrial development 126
Nitrogen producers face foreign competition 438
Nitrogen: trouble maker 563
Opportunity for constructive service. 318
S. W. Parr, 1857-1931 318
Phosphoric acid at Muscle Shoals?... 686
Place of the exposition in chemical engineering 186
Plans and specifications for a new leadership 125
Production becomes distribution minded 686
Random impressions of the Chemical Show 259
Reforming the baleful byproduct.... 438
Repumping system creates new steam hydro power competition 259
Richard B. Moore, chemical connoisseur 67
Tar products markets deserve careful study 378
Ten thousand more chemical engineers for industry to absorb..... 685
Their unemployment problem is ours.. 688
Threatened extension of governmental regulation 319
To Swampscott with the chemical engineers 258
Too many cooks for the patent broth 439
Triumph of an idea backed by courage and money 66
Waste—byproduct—staple 497
